

Opportunities to support English:

(Texts: Where the Forest Meets the Sea / Kensuke's Kingdom / Observational Poems

- Descriptions of tropical settings
- Diary entries
- Poems
- Mayan Play scripts link to History

DT:

How can I use computer programming to control a vehicle?

Use scratch software to control the movements of an electronic car via electronic inputs and outputs.

PE:

How do different themes affect the style of dance?

Create and refine dances.

How can I control a ball accurately with my feet?

Further develop skills to play games of football and netball.

RE:

How do Hindus celebrate Diwali?

Enquire into the concept of good and evil.

Art:

How have good and evil been portrayed by artists in the past?

Study how great artists have depicted the concepts of good and evil. Plan and complete their own drawing showing this concept.

PSHE:

Is it ok to say no?

Learn about appropriate friendships and keeping safe including online.

How and why will my body change?

Learn the key facts about puberty and the changing adolescent's body.

Super Starter

Chichester Planetarium Trip

Marvellous Mayans!

How did Mayan life compare with life today?

Fantastic Finish

PBL Space Museum

Science:

Electricity: How do electrical circuits work?

Extend knowledge of electrical circuits.

Space and Gravity: What goes on in our solar system?

Learn fascinating facts about our solar system.

Computing:

How can I create an interactive quiz?

Use repeated hyperlinks to create a PowerPoint quiz all about the Mayans. Microsoft Sway introduced.

Spanish:

How can I describe body parts in Spanish?

Extend vocabulary knowledge.

How do Spanish celebrate?

Learn about the Day of the Dead and Christmas festivals.

Geography:

What is unique about chocolate?

Explore economic activity for the Mayans in Mexico.

History:

How did Mayan life compare with today?

Study Mayan society and the possible reasons for its decline.

Music:

How has music changed throughout history?

Study music from different eras and genres.

Opportunities to support Maths:

Data handling as part of science

Homework Task Sheet

| | | |
|-------------|-------------|--|
| Year Group: | Term: | Due Dates for Project Homework: |
| 5 | Autumn term | 24 th October / 15 th December |

Project Homework:

This term we have selected a variety of different homework projects that we think you and your child will enjoy completing at home. We ask that your child attempt at least one task per half term although they can do more if they wish. The deadline dates for submission of homework tasks are Monday 16th October and Monday 11th December. However, your child can bring their work in at any time before these dates.

Autumn Term Projects

- Make your own Mayan style pyramid – what creative materials could you use?
- Make / cook something fit for a Mayan. What might they have eaten? Take a photo or bring it in to share. How about making up your own recipe based on maize.
- Make a Mayan statue.
- Create your own Mayan style game. Tell us how it is to be played, the rules and everything about it. Can you have a go at playing the game?
- Research and sketch what a Mayan house would look like.
- Create a page from a travel brochure or a Trip Advisor review to entice people to visit Central America on holiday. What exciting things could they do?
- Produce a fact file about a part of Central America. You could include a picture of the flag, information about the climate, population, industry, agriculture and tourism. This could be completed as a poster, leaflet, booklet, PowerPoint or in any other creative format you can think of.
- Write a script with at least two characters. What do the characters say to each other? Where are the characters? What will the characters do?

We hope that a couple of these tasks sound appealing and we look forward to seeing how you get on.
The Year 5 Team.

Weekly Homework:

Read five times a week, record in your reading diary and bring your diary in to school.
Practise all times tables and division facts to prepare for weekly tests.
Complete MY MATHS online homework
Complete spelling task or learn example words for testing.

| Subject / Unit | Objectives (including knowledge) | Skills Children at the expected standard can... | Suggested Learning Activities (Opportunities identified for PROJECT BASED LEARNING / OUTDOOR LEARNING / GROW IT VALUES / HEARTS VALUES) |
|---|--|--|---|
| <p>ART</p> <p>Drawing (Good / Evil Portraits)</p> <p>Artist study</p> <p><i>KEY QUESTION: The Dark side or into the light: How has good and evil been portrayed by artists in the past?</i></p> <p><i>KEY VOCABULARY: sketching Shading Hatching texture</i></p> | <p>To use sketchbooks to practice techniques and to record ideas.</p> <p>To work in a sustained and independent way to create a detailed drawing.</p> <p>To develop a key element of their work: line, tone, shading, texture.</p> <p>To use different techniques for different purposes i.e. shading, hatching within their own work.</p> <p>To develop close observation skills.</p> <p>To discuss and review own and others work, expressing thoughts and feelings, and identify modifications/ changes and see how they can be developed further.</p> <p><i>INITIAL ASSESSMENT: Ask children to sketch a good/evil picture using pencil. Share and discuss themes and any good sketching techniques. Select an area of their work to develop (e.g line, tone, shading, texture).</i></p> <p><i>FINAL ASSESSMENT:</i></p> | <p><u>Exploring and Developing Ideas (including Work of Other Artists)</u></p> <p>Describe the processes they are using and how they hope to achieve high quality outcomes.</p> <p>Collect and develop further ideas using sketchbooks, beginning to explain their choices.</p> <p>Continue to build knowledge of techniques by starting to experiment and predict what might happen.</p> <p>Continue to practise and share learning and skills with others, evaluating their work.</p> <p><u>Drawing</u> Work in a sustained way to create a detailed drawing.</p> <p>Use different grades of pencil and a wide range of other drawing implements to make different marks, lines, patterns and shapes within a drawing.</p> | <p>Discuss famous artists and look at examples of his/her work. Record thoughts/observations in sketch books. How have they explored the concepts of good and evil?</p> <p>Use viewfinders to explore areas of pictures in more detail.</p> <p>Discuss drawing techniques and practice these using different media (e.g different types of pencil/ charcoal/pen).</p> <p>Practice different techniques (sketching, shading, hatching) within their own work. Use the viewfinder to focus on an area of an artist's drawing...can they recreate this?</p> <p>Plan their own drawing showing good and evil. What media will they use? How will they show/good evil? Can they use different drawing techniques to good effect?</p> <p>GREATNESS / RESILIENCE / ORIGINALITY / WONDER Be AMBITIOUS</p> |

| Subject / Unit | Objectives (including knowledge) | Skills Children at the expected standard can... | Suggested Learning Activities (Opportunities identified for PROJECT BASED LEARNING / OUTDOOR LEARNING / GROW IT VALUES / HEARTS VALUES) |
|--|--|---|--|
| | <i>Children create their own good/evil picture inspired by their favourite artist, own choice of media, showing an understanding of techniques.</i> | Begin to use different techniques for different purposes i.e. shading, hatching within their own work to show light and shadow effects. | |
| <p>COMPUTING</p> <p>Desktop Publishing (Mayan Sway)</p> <p><i>KEY QUESTION: How can I create an interactive presentation using Sway</i></p> <p><i>KEY VOCABULARY: CARD – A content block in Sway used to add text, images, videos, or other media. GROUP – A way to combine multiple cards so they appear together in a section. Section – A part of a Sway</i></p> | <p>I can research key facts about the ancient Maya civilisation using safe and reliable online sources.</p> <p>I can plan and create a multimedia presentation using Microsoft Sway with text, images, and other media.</p> <p>I can structure and design digital content to suit a specific audience.</p> <p>I can evaluate my presentation and explain how digital tools help me share historical information clearly and creatively.</p> <p>INITIAL ASSESSMENT: <i>Ask the children to describe what makes a good digital presentation.</i></p> <p>FINAL ASSESSMENT: <i>Children refine and collaborate before presenting their Sway that uses text, images, sound, and links</i></p> | <p><u>Information Technology:</u></p> <ul style="list-style-type: none"> • Collaborate with peers using online tools, e.g. blogs, Google Drive, Office 365 • Create and export an interactive presentation including a variety of media, animations, transitions and other effects. • Start to apply other useful effects to my documents such as hyperlinks. • Import sounds to accompany and enhance the text in my document. • Organise and reorganise text on screen to suit a purpose | <p>Mayan Presentation Microsoft Sway</p> <p>Lesson 1: Introduction to the Mayans and Planning the Presentation Pupils are introduced to the Mayan civilisation through a short video or class discussion, focusing on key areas such as food, temples, writing, and gods. They choose 3–4 subtopics to explore and begin researching using books, websites, or teacher-provided resources. Pupils record their findings in a planning sheet and begin thinking about how they will present this information in Sway.</p> <p>Lesson 2: Creating a New Sway and Organising Content Pupils log in to their Office 365 accounts and open Microsoft Sway. They create a new presentation and begin adding text cards for each of their chosen topics. Pupils learn how to group related content into sections and experiment with the order of their cards to make the information flow clearly and logically.</p> <p>Lesson 3: Adding Images and Choosing Layouts Pupils use the built-in image search in Sway to find copyright-friendly images that match their topics. They insert images into the appropriate sections and explore different layout styles (e.g. vertical, horizontal, grid) to see how it affects the look and feel of their presentation. Pupils are encouraged to think about how layout can help the viewer understand the information better.</p> <p>Lesson 4: Using Hyperlinks to Add Depth Pupils learn how to copy and paste hyperlinks into their Sway to connect their audience with more information. They find and add links to useful resources such as a Mayan timeline, a museum website, or a</p> |

| Subject / Unit | Objectives (including knowledge) | Skills Children at the expected standard can... | Suggested Learning Activities (Opportunities identified for PROJECT BASED LEARNING / OUTDOOR LEARNING / GROW IT VALUES / HEARTS VALUES) |
|--|---|---|---|
| <p><i>presentation that helps organise content into clear topics or themes.</i></p> <p><i>DESIGN – The visual style and layout options in Sway that change how your presentation looks.</i></p> <p><i>STORYLINE – The editing view in Sway where you build and arrange your content step by step.</i></p> <p><i>PREVIEW – A feature that lets you see how your Sway will look to others before sharing it.</i></p> <p><i>REMIX – A tool in Sway that automatically changes the design and layout of your presentation.</i></p> <p><i>ACCESSIBILITY – Features in Sway that help make</i></p> | <p><i>to communicate what they've learned about the Mayans.</i></p> | | <p>video tour of a temple. Pupils test their links to make sure they work and are relevant to their content.</p> <p>Lesson 5: Enhancing with Sound</p> <p>Pupils explore how to upload or record audio in Sway. They add sound clips such as jungle background noise, traditional Mayan music, or a voice recording of themselves reading a Mayan myth or fact. Pupils place the audio in the most relevant section and test how it plays, considering how sound can enhance the viewer's experience.</p> <p>Lesson 6: Reviewing and Improving Presentations</p> <p>Pupils share their Sway with a partner and use a checklist to give and receive feedback on layout, content, sound, and links. They make improvements based on the feedback, including fixing any broken links, improving text clarity, or adjusting the order of sections. Pupils preview their final Sway and prepare to present it.</p> <p>Lesson 7: Presenting and Reflecting</p> <p>Pupils present their completed Sway to the class or in small groups, explaining how they used text, images, sound, and links to share what they learned about the Mayans. After presenting, they reflect on what they found most interesting about the Mayans and how using Sway helped them communicate their ideas in a creative way.</p> <p>INDEPENDENCE, TEAMWORK</p> |

| Subject / Unit | Objectives (including knowledge) | Skills Children at the expected standard can... | Suggested Learning Activities (Opportunities identified for PROJECT BASED LEARNING / OUTDOOR LEARNING / GROW IT VALUES / HEARTS VALUES) |

| <i>content easier to read and navigate for all users.</i> | | | |
| <p>DT</p> <p>Electronics (Blue Bots)</p> <p><i>KEY QUESTION: How can I use computer programming to control a vehicle?</i></p> <p><i>KEY VOCABULARY: Design brief, audience, components, input, output, trouble shooting, coding</i></p> | <p>To explore a computer programme to complete simple movements.</p> <p>To use my understanding to produce more complex movements.</p> <p>To evaluate my skills and troubleshoot bugs in my code.</p> <p><i>INITIAL ASSESSMENT: Children discuss the 'input' needed to direct a peer along a route.</i></p> <p><i>FINAL ASSESSMENT: Children to use 'input' and 'output' knowledge to direct cars along route.</i></p> | <p>Design Explain their choices when designing a product including reasons related to the design brief – what programming inputs will be needed? Independently generate ideas for a product, considering its purpose and audience and level of difficulty.</p> <p>Make Begin to choose from a range of techniques and use them safely - Build on their knowledge of simple movements to put a series of movements together to make a more complex programme.</p> <p>Evaluate their finished product, focusing on the key questions: Does my product fit the design brief? Is my product fit for purpose and audience?</p> | <p>Blue Bots – Children to create a program to control the crumble kit cars for a range of uses e.g. different routes, races, tracing lettering/ writing.</p> <p>Design – Children to use 'scratch-like' program to code a route for the Blue Bot to take. Children will need to experiment with the car and commands to see what is possible with them. Part of this design process will be the children attempting simple individual movements. These will include: - Forward – backwards – right turn – left turn – full turn – circular route Only when each of these has been successfully completed, children will move on to the 'Make'.</p> <p>Make – Start to understand that mechanical and electrical systems have an input and output. Be aware of what components are needed to make a complete circuit. Children will then use their knowledge from the design section to code the cars to follow a series of routes drawn out on paper. These will begin simple (a small circular route) and will increase in difficulty (figure of eight). If the children manage to successfully code routes they will then be given a route that includes a 'traffic light' and 'parking area'. Finally, the children will be asked to design their own route using all of these skills.</p> <p>Evaluate – Children can troubleshoot simple problems by finding a bug and fixing. Begin to evaluate their work both during and at the end of a project using key questions. Does my product fit the design brief? What worked well? Why? What would you change? Why? What new skills have you learnt? How could these skills be used for other activities/ tasks?</p> |

| Subject / Unit | Objectives (including knowledge) | Skills Children at the expected standard can... | Suggested Learning Activities (Opportunities identified for PROJECT BASED LEARNING / OUTDOOR LEARNING / GROW IT VALUES / HEARTS VALUES) |

| | | What would I change if I were to make it again? | (RESILIENCE / TEAMWORK) |
| <p>GEOGRAPHY</p> <p>Economic Activity – Mexico’s Chocolate Industry</p> <p><i>KEY QUESTION: What is unique about chocolate?</i></p> <p><i>KEY VOCABULARY: economy, climate, employment, tourism, fair trade</i></p> | <p>AIM: To improve knowledge and understanding of economic activity linked to chocolate and how the UK is connected to North America through trade</p> <p>1. To develop knowledge of the location of each continent and ocean.</p> <p>2. To identify continents and oceans bordering North America.</p> <p>3. To identify the human and physical features of North America and describe the pattern across the continent using the eight points of a compass.</p> <p>4. To use key locational and positional vocabulary.</p> <p>5. To identify the human and physical features of Mexico and describe the pattern across the country using the eight points of a compass.</p> <p>6. To compare the UK with Mexico.</p> | <p>1. Independently, use maps, atlases, globes and digital/computer mapping to locate countries and describe in detail and begin to explain features studied</p> <p>2. Use the eight points of a compass independently to build their knowledge of the United Kingdom and the wider world</p> <p>3. Begin to use six figure grid references with teacher support to build their knowledge of the United Kingdom and the wider world</p> <p>4. Independently use a range of symbols and keys (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world</p> <p>5. Use fieldwork to make predictions, collect data and analyse results independently, presenting</p> | <p><u>Activity 1</u> Objectives: 1, 2, 3, 4 Skills / Knowledge: 1, 2 <u>Where in the world is North America and what is it like?</u> Recap the world’s continents and oceans before identifying the continents and oceans bordering North America. Use maps to find out about North America’s environmental regions, key physical/ human characteristics, countries, major cities. Describe the pattern of features they have identified using the points of a compass etc. Discuss and explore time zones WONDER</p> <p><u>Activity 2</u> Objectives: 1,2,3,4,5 Skills / Knowledge: 1,2,3 <u>Where in North America is Mexico and what is it like?</u> Locate Mexico using key vocabulary including its position within North America, bordering countries and oceans. Identify the time in Mexico compared to the UK. Use maps, atlases and other resources to find out about Mexico’s environmental regions, key physical and human characteristics, countries, and major cities. Describe the pattern of features they have identified using the points of a compass. Produce a poster/factfile about Mexico to include a range of geographical information (human and physical) including: a sketch map of Mexico, information about the countries and oceans around Mexico, population, climate, cities and regions, attractions economy and exports, national flag etc. WONDER</p> |

| Subject / Unit | Objectives (including knowledge) | Skills Children at the expected standard can... | Suggested Learning Activities (Opportunities identified for PROJECT BASED LEARNING / OUTDOOR LEARNING / GROW IT VALUES / HEARTS VALUES) |
|----------------|---|---|---|
| | <p>7. To learn that the chocolate flavour comes from a cocoa pod which grows on a tree.</p> <p>8. To develop the knowledge that Mexico is one of the world's growers (producer) and sellers (exporter) of cocoa</p> <p>9. To recognise where cocoa is grown and understand the conditions needed for growing.</p> <p>10. To understand that the climate of Mexico is different to the UK because it is closer to the equator and they have more concentrated sun which leads to higher temperatures and rainfall all year round.</p> <p>11. To empathise with and understand the life of a cocoa farmer.</p> <p>12. To evaluate the farmer's working life.</p> <p>13. To understand that cocoa gets bought from the farmer, transported to the UK and sold to the manufacturer.</p> | <p>findings by beginning to select appropriate methods, then drawing conclusions and evaluating findings independently using evidence from their fieldwork</p> | <p><u>Activity 3</u> <u>Objectives: 4, 5, 6, 7,</u> <u>Skills / Knowledge: 1,2</u> <u>What connects us to Mexico?</u> Game - What can I feel? Place a few items under a towel or in a bag for children to feel and guess what the connection is and what country the items may be linked to, e.g. a leaf, some sand, a chocolate bar, a football Discuss and predict answer to the key question with suggested reasons. Use maps to give ideas about what connects us to Mexico. Begin to discuss connections and the similarities and differences between the UK and Mexico. Discuss and research what cocoa is and the chocolate connection to Mexico. Using maps, atlases etc. find cocoa producing countries and identify their position in the world using geographical features WONDER</p> <p><u>Activity 4 and 5</u> <u>Objectives: 4, 6, 7,8,9, 10, 11, 17</u> <u>Skills / Knowledge: 1,2,3,4</u> <u>Introduce key question – What is unique about chocolate?</u> <u>Explore where is cocoa grown?</u> World cocoa production – graph (Grown - 10° north and south of the equator in humid tropic climates with regular rains and a short dry season. They need even temperatures between 21-23°C with fairly constant rainfall all year of 1000-2500mm per year. Is this the same as the UK climate? – no! Average temperature approximately 10°C with a big range (remind them of the winter and summer) and about 800mm of rain each year.) Describe location of UK and Mexico using geographical vocabulary, e.g. equator, latitude, longitude, Africa, South America, North America, Asia.</p> |

| Subject / Unit | Objectives (including knowledge) | Skills Children at the expected standard can... | Suggested Learning Activities (Opportunities identified for PROJECT BASED LEARNING / OUTDOOR LEARNING / GROW IT VALUES / HEARTS VALUES) |
|----------------|--|---|---|
| | <p>14. To understand that the cocoa gets transported to the UK as a raw product not as a chocolate bar.</p> <p>15. To understand what factory work is like.</p> <p>16. To evaluate factory and farm life.</p> <p>17. To compare employment in the local area to employment in Mexico.</p> <p><i>INITIAL ASSESSMENT: Free-hand map of world and locate continents, oceans and Mexico</i></p> <p><i>FINAL ASSESSMENT: Independent fact-file using evidence to answer key question: 'What is unique about chocolate?'</i></p> | | <p>Discuss and update prediction to KQ. Remove or add to suggested reasons/ideas.</p> <p>Explore the conditions needed for growing cocoa to learn how the weather (hot all year round because it is close to the equator and therefore consistent sunshine) supports and allows cocoa to thrive. Find out and discuss the risks the cocoa plant faces and how farmers combat those risks.</p> <p>Explore UK farming and local farms (as a comparison) and what is grown on our local farms. (Links to Northney Farm – dairy herd, ice cream, seasonal crops, tea rooms etc) with a focus on one crop/aspect and compare it to the cocoa plant. Use digimaps for grid reference and keys</p> <p>Fieldwork. Could visit a local farm (or produce questions to ask local farmer and email/post!) to look at what they grow, the conditions needed for a successful crop and the risks the crop faces.</p> <p>WONDER EMPATHY</p> <p><u>Activity 6 (Could be combined with activity 7)</u></p> <p><u>Objectives: 11, 12, 13, 14, 15, 16</u></p> <p><u>Skills / Knowledge: 1, 2</u></p> <p><u>Who grows the cocoa?</u></p> <p>Use videos of the life of a farmer – YouTube, written stories and descriptions of the life of a farmer, BBC Bitesize:</p> <p>Cocoa farmers fair trade – extracts of the life of a cocoa farmer</p> <p>YouTube – A cocoa farmer’s story (set in Ghana not Ivory Coast or Mexico but the message is the same) the man behind your chocolate https://www.bbc.com/bitesize/articles/z7jdnrd - economic activity</p> <p>Update prediction - remove or add to suggested reasons.</p> <p>Explore and find out about the job of a cocoa farmer.</p> <p>Compare it to the life of someone they know who works for context.</p> <p>Evaluate the benefits and challenges (fluctuating prices due to supply and demand) of being a cocoa farmer.</p> <p>To discuss and explore the concept of Fair trade.</p> <p>EMPATHY WONDER</p> |

| | | <u>Organisation and Communication:</u> Research and select data, organising it to communicate knowledge and understanding, beginning to show empathy. | |
| MUSIC (1) Unit: Solar System <i>KEY QUESTION:</i> <i>What do the planets sound like?</i> <i>KEY VOCABULARY:</i> <i>Ostinato, major, minor, consonance, dissonance, solo, unison, time signature.</i> | To listen with attention to detail and recall sounds with increasing aural memory To appreciate and understand a wide range of high-quality live and recorded music drawn from different traditions and from great composers and musicians. To develop an understanding of the history of music To play and perform in solo and ensemble contexts, using their voices and playing musical instruments with increasing accuracy, fluency, control and expression. To use and understand other musical notations. To describe some of the key composers of the Romantic period. | <u>Performing – singing:</u> Perform a song with expression and with attention to tone and phrasing. Begin to sing with an awareness of dynamics. <u>Performing – instruments:</u> Play in unison with other pupils, beginning to keep to a set tempo. Begin to use and manipulate a range of dynamics for expressive effect. Perform different parts as an ensemble, keeping in time with each other. <u>Composing:</u> Choose instruments to compose a piece of music with an awareness of its purpose. Begin to use dynamic variation and tempo | Follow lessons in Music Express Book 5 (Ages 9-10), Solar System, pages 14-19. Whiteboard slides and audio files in StaffShare/ Music/ Planning/ Music Express. As Holst, the composer, is a Romantic composer, listen to and discuss other music from the Romantic era including Lili Boulanger, Tchaikovsky and Elgar. BBC Ten Pieces links below. Relate to music timeline in Y5 planning folder. Describe how Romantic music differs to Baroque and Classical, studied in Autumn 1. https://www.bbc.co.uk/teach/ten-pieces/KS2-tchaikovsky-the-nutcracker-waltz-of-the-flowers-russian-dance/z4y3rwx https://www.bbc.co.uk/teach/ten-pieces/KS2-edward-elgar-enigma-variations-11-6-7/zdqdbdm https://www.bbc.co.uk/teach/ten-pieces/KS2-gustav-holst-mars-from-the-planets/zf6hsrd Key questions: How does the music make you feel? Do you feel the same all the way through? Do you think it sounds major or minor or both? Which instruments can you hear? Are there any solo or unison parts? Can you hear any drones or an ostinato? Can you hear any consonance or dissonance in the music? How do the dynamics contribute to the effect? Do you like the music? Do you think the composer wants you to like the music? |

| Subject / Unit | Objectives (including knowledge) | Skills Children at the expected standard can... | Suggested Learning Activities (Opportunities identified for PROJECT BASED LEARNING / OUTDOOR LEARNING / GROW IT VALUES / HEARTS VALUES) |
|----------------|---|---|---|
| | <p>To describe what music from the Romantic period sounds like and how this is different to the Baroque and Classic periods.</p> <p>To discuss music with increasing awareness of the dimensions.</p> <p>To interpret images to create descriptive sound sequences.</p> <p>To learn a melodic ostinato.</p> <p>To perform a song with expression and with attention to tone and phrasing.</p> <p>To create a musical background to accompany a poem.</p> <p>To create and present a performance of song, music and poetry.</p> <p>INITIAL ASSESSMENT: <i>Play Tchaikovsky The Nutcracker and ask children to describe it using musical language.</i></p> <p>FINAL ASSESSMENT: <i>Play Holst The Planets and ask children to describe it using musical language.</i></p> | <p>imaginatively, and with intention, to convey a musical idea.</p> <p>Begin to apply playing skills, knowledge and experience when improvising and composing</p> <p><u>Notation:</u> Begin to develop the use of appropriate notation to accurately record and communicate ideas.</p> <p><u>Listening / Appraising:</u> Discuss and evaluate music with a focus on the effect and how this has been achieved. Begin to discuss and compare music with an increasing music vocabulary. Evaluate and refine their own compositions.</p> <p><u>History / Genres of Music:</u> Describe in increasing detail what music from the four main periods of music history sounds like. Describe some of the key composers of the four main periods of music history.</p> | <p>Sing the chorus, verse and bridge of <i>Sun blast</i>. Listen to the first section of <i>Music of the starry night</i> by George Crumb. To help the children notice different details in <i>Music of the starry night</i>, listen several times, with discussion between each listening. Select instrumental timbres and dynamics to play a star sequence</p> <p>Sing the whole <i>Sun blast</i> song and highlight the use of dynamics. Listen to the second section of <i>Music of the starry night</i> and perform the ostinato from <i>Music of the starry night</i>. To help those children who find it difficult to learn the ostinato, first ask them to play only the main beats with their left hand: A G D F G. When they have memorised this pattern, add the right hand (C) by alternating between each left hand main beat.</p> <p>Explore rap techniques in the verses of <i>Sun blast</i>. Listen to the effect of different tempos in creating character in music. Select instrumental sounds and melodies for six planets and play a musical orrery. To help the children understand the staff notation and learn the rhythms of the <i>Planets in orbit</i> melodies, ask them what they notice about the time signature of each. (It is 6/4). Can any instrument learners explain to others what this means. (There are six crotchet beats in each bar.)</p> <p>Learn to sing <i>Footprints on the moon</i>. Watch a graphic representation of the texture of Debussy's <i>Clair de lune</i>. Listen to the lunar dance section of <i>Footprints on the moon</i>. To help less confident children improvise the <i>Footprints on the moon</i> lunar dance, select individual chime bars and place these in a row to play the notes of the whole tone scale. Alternatively, remove the unused notes from xylophones.</p> <p>Recap <i>Footprints on the moon</i> and discuss and learn the second verse</p> |

|---|---|---|---|
| | | | <p>Earthrise from Apollo. Listen to music by Richard Strauss, associated with space exploration. Thinking about texture, use the poem <i>Space shot</i> by Gareth Owen as a framework to develop a launch pad piece. Record a performance of the <i>Space shot</i> music and poem. Listen so that the children can check whether the balance between narrator and music allows the poem to be clearly heard. If necessary, players can adjust the volume where appropriate.</p> <p>Recap singing the chorus, verses 1 and 2 and lunar dance sections of <i>Footprints on the moon</i>. Learn that scoring is about choosing and arranging sounds. Create a performance which takes a tour to the Sun, planets and Earth's moon. When you have chosen the order of pieces for the performance, make a large wall plan to remind the players of the structure. Use some of the ideas for graphics and notations from the unit or create your own, to support the players as appropriate.</p> <p>ORIGINALITY – composing TEAMWORK – playing together</p> |
| <p>MUSIC (2)</p> <p>Unit: Mayan Music</p> <p><i>KEY QUESTION: Why was music important to the Mayans?</i></p> <p><i>KEY VOCABULARY: Ceremony, melody,</i></p> | <p>To appreciate and understand a wide range of music drawn from different traditions</p> <p>To improvise and compose music for a range of purposes using the inter-related dimensions of music.</p> <p>To explain why music is important in our culture and in other cultures.</p> | <p><u>Performing – instruments:</u> Perform different parts as an ensemble, keeping in time with each other.</p> <p><u>Composing:</u> Choose instruments to compose a piece of music with an awareness of its purpose. (Activities 4 and 5)</p> | <p>What is a food chain? Can you draw a simple one?</p> <p>Activity 1 Complete electrical glossary. Build simple circuits and test for insulators. (Purpose: To revise simple circuits and vocabulary from LKS2.)</p> <p>RETRIEVAL Revisit key definitions - Electricity, batteries, wires, insulator conductor, circuit</p> <p>Activity 2 How does the number of lamps in a circuit affect how long a battery lasts? GROWIT (Purpose: To apply substantive knowledge of voltage in a circuit to form a conclusion and explanation to a scientific enquiry question.)</p> <p>RETRIEVAL Recall the definitions of current and voltage.</p> <p>Activity 3 How does the length of time I leave the current flowing affect the brightness of the bulb? GROWIT Plants: oxygen and carbon dioxide (Purpose: To take accurate measurement and repeat readings from an investigation. A digital lux meter could be used to take repeated readings of a circuit left on throughout a day. At each interval repeat readings should be taken and an average calculated.) GROWIT</p> <p>RETRIEVAL Define a conductor, give examples</p> |

| | <p>including the wires. (Activities 4 and 5)</p> <p>Resistance is the slowing down of electrical current. (Activities 4 and 5)</p> <p>The more devices added into a circuit the greater the resistance. This means less current flows around the circuit (Activities 4 and 5)</p> | | <p>Activity 4 How does the length of a wire affect how bright a bulb is?</p> <p>(Purpose: To develop the understanding and use of variables.) GROWIT</p> <p>RETRIEVAL Explain what current does as it passes through a device and the effect of a larger current on the device. Label the parts of a flowering plant.</p> <p>Activity 5 Does the type of wire used in a circuit affect the resistance? GROWIT</p> <p>The previous activity could be used as a scaffolded activity with lots of guidance from the teacher in identifying variables (especially the control variables) with plenty of follow up assessment and checking for understanding. The second activity could then be used as an independent activity where children have to consider the variables and control them in the investigation themselves</p> |
| <p>SCIENCE (2)</p> <p>Space and Gravity</p> <p><i>KEY QUESTION: What goes on in our solar system?</i></p> <p><i>KEY VOCABULARY:</i></p> | <p>Substantive knowledge (Key vocabulary identified in bold)</p> <p>To know that:</p> <p>A Solar system is a collection of planets, which orbit (a curved path) a star. (Activity 1)</p> <p>There are huge number of stars in space and therefore a huge</p> | <p>Disciplinary knowledge Instructed / Undertaken / Revisited (Working Scientifically)</p> <p>Identifying scientific evidence that has been used to support or refute ideas or arguments (Activity 1)</p> <p>Taking measurements, using a range of scientific</p> | <p>RETRIEVAL What are the seasons, and how are they different?</p>  <p>Activity 1 Give children model of solar system discuss and define terms : solar System, orbit, sun, - discuss the model and the fact it is not to scale.</p> |

| <p><i>Sun, star, planet, moon, satellite, phases, universe</i> <i>Diameter, radius, gaseous, rocky</i> <i>Weight, gravity</i> <i>Orbit, spin</i> <i>Galaxy, Milky Way</i> <i>Heat, light</i></p> <p><i>NB. Lots of shared vocabulary with Forces and Light.</i></p> <p>Building Block</p> | <p>number of solar systems. (Activity 1)</p> <p>Our solar system consists of 8 planets, many of those planets have moons which orbit around them. (Activity 1 and PBL)</p> <p>Our solar system can be represented with a model (see diagram), but it isn't possible to draw it to scale. (Activity 1 and PBL)</p> <p>The planets and moons are rotating (spinning) (Activity 1 and 2)</p> <p>The time it takes one planet to rotate is called a day. The time it takes a planet to complete one orbit around its star is called a year. (Activity 1 and 2)</p> <p>The time it takes one planet to rotate is called a day. On Earth this is 24 hours (Activity 2)</p> <p>Asteroids are lumps of rock that orbit a star (there are millions in between Mars and Jupiter) (Activity 3 and PBL)</p> | <p>equipment, with increasing accuracy and precision, taking repeat readings when appropriate - Recording data and results of increasing complexity using scientific diagrams and line graphs. (Activity 2)</p> <p>Taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate - Recording data and results of increasing complexity using scientific diagrams and line graphs. (Activity 3)</p> <p>Identifying scientific evidence that has been used to support or refute ideas or arguments. (Activity 4)</p> <p>Apply substantive knowledge to develop ideas and models of phenomena. (Activity 5)</p> | <p>Predict and explain how the temperature of each planet may vary. Use data to check and then consider which planets could possibly host life (it must contain liquid water for at least some time) Predict how long each planetary year might be and compare with data. Use the software below to show the solar system on screen. As children to consider why Pluto was changed from a planet to a dwarf planet in 2006 https://www.solarsystemscope.com/</p> <p>The classification of planets requires three things - 1. It is in orbit around the sun, 2. It is round shaped, 3. It has cleared its orbit. When these new ideas were introduced the evidence from Pluto meant that it only met two out of the three criteria. (It didn't meet number 3)</p> <p>"Cleared the neighbourhood" means that the "planet" has to be the dominant gravitational body in their orbit around the sun. This means that the "planet" has to cruise its orbit while consuming or slinging away smaller objects in its orbital path.</p> <p>(Purpose: To apply substantive knowledge to make scientific predictions and to identify what evidence has been used to refute ideas.) GROWIT/PBL</p> <p>RETRIEVAL Definitions of solar system, planets, orbit and star; Activity 2 Shadow stick investigation. Why does the sun seem to move across the sky? How do shadows change throughout the day? GROWIT/OUTDOOR LEARNING</p> <p>(Purpose: To take accurate measurements during an investigation. In all of these activities the focus should be on taking accurate recording of data using specific instruments.)</p> |

| | <p>Comets are objects that are made of Ice, which melts when they get closer to the sun leaving a tail. (Activity 3 and PBL)</p> <p>Gravity is force of attraction between two objects with mass (a quantity of matter) (Activity 4)</p> <p>The bigger the mass the bigger force it exerts. (Activity 5)</p> <p>Gravity works over distance but gets weaker as distance increases. (Activity 5)</p> <p>Stars, planets, moons have a very large amount of mass. They exert a gravitational attraction on each other. (Activity 5)</p> <p>Differences in gravity result in smaller mass objects orbiting around larger mass objects, e.g., planets around stars and moons around planets (Activity 5)</p> <p>The solar system is with a massive collection of stars called the galaxy (called the Milky way) (PBL)</p> | | <p>RETRIEVAL Definition of moon, solar system, rotating day, orbit and year Definitions of electricity, batteries, wires</p> <p>Activity 3 Investigate moon craters. How does the speed / size of a meteorite affect the size of a moon crater formed? Sand trays and balls work well. Craters should be measured purposely, and each size balled repeated.</p> <p>(Purpose: To take accurate measurements during an investigation. In all of these activities the focus should be on taking accurate recording of data. Students should be encouraged to think about repeating each test and calculating an average value.</p> <p>RETRIEVAL Definitions of star, moon, planet, galaxy, universe Recall definitions of electrical current and voltage</p> <p>Activity 4 Introduction to gravity and falling objects pbs media</p> <p>(Purpose: To know the difference between weight and mass that all objects fall at the same time regardless of their mass.</p> <p>RETRIEVAL Definition of gravity</p> <p>Activity 5 Presentation by staff on space, gravity and the moon at Chichester planetarium. Cover following questions:</p> <ul style="list-style-type: none"> • If the moon became heavier as a result of meteorite collisions what would happen to its position relative to the Earth? |
